DOWNLOAD

In 2563, a catastrophic war known as "The Fall" aka "The Great War" has left Earth devastated. While scouting the junkyard metropolis of Iron City, cyborg scientist Dr. Dyson Ido discovers a disembodied female cyborg with a fully intact human brain. Ido attaches a cyborg body to the brain, who does not have any recollections of her past, and names her "Alita" after his deceased daughter, for whom he originally built the body.
